

St John
Ambulance

St John Ambulance training

Health and safety and **first aid** for the workplace

Course schedule: October 2009 – June 2010

North East

On-site training

 Let us bring our training to you.

It's not always practical to take staff off-site for training. Sometimes, the most effective place to learn is where you'll actually be using your new-found skills and knowledge. In which case, we'll bring our training to you.

Our priority is that you get the training you need, so we make it as simple as possible by arranging training at a time, day and location to suit you. It's good for our highly skilled trainers, too, who enjoy the opportunity to get out of the classroom and teach in a working environment.

All we need to set up a course for you:

- You need a group of people on the same course
- A room large enough for the group to work in safely and comfortably. If you don't have one, we'll happily advise on a suitable venue nearby
- Details of dates and times that suit you.

To find out more visit www.sja.org.uk/onsite or call **08700 10 49 50**

Online support – information at your fingertips, anytime

We're delighted to announce the launch of our enhanced training website so now you can either phone or go online and book your training course.

Designed for maximum usability, our website makes finding the information you want to assess your needs and book your training course as seamless as possible. Benefits of our website include:

- **Interactive tools** – Not sure what training you require? Give us a few basic facts about your business and we'll tell you instantly what training gaps, if any, need filling to meet your legal obligation
- **Course search** – Find a training course, venue, date and time to suit you. We'll also give you a list of options if your preferred choice is already full
- **Online booking** – No need to phone us unless you want to. You can book your course directly from the website
- **Regular updates** – Sign up for our regular eNews and we'll keep you informed of your responsibilities and requirements throughout the year.

As well as these interactive tools, there's a wealth of useful information and other features on the site. Rather than list them all here, though, we'd like to invite you to visit www.sja.org.uk/training and see for yourself.

Course prices may vary

You may notice some courses vary in price between regions. We'd like to reassure you this does not reflect on the quality of a course, merely on the cost of providing the course and venue in certain areas. The cost for each course is indicated above each county's course availability table. Please check carefully.

First aid: Emergency first aid at work

This new course is developed in line with the Health and Safety Executive's (HSE's) changes to the First aid at work regulations. It is designed for lower-risk businesses, where a risk assessment has indicated that a lower level of first aid cover is sufficient.

Course duration: One day (6 hours)

First aid: Automated external defibrillation (AED)

For each minute that passes after the heart stops, before treatment is received, the chance of survival drops by about 10%. This course teaches the essential skills required by an AED operator. No previous first aid knowledge is necessary to attend an AED course.
